

GIVE A SCRAP

FOOD SCRAP PICKUP SERVICE

BUSINESS PROGRAM

At *Iris Waste Diversion Specialists*, we're continuously looking for ways to stop things from going to waste. To keep food scraps from the landfill and help your business do the same, we offer a simple, reliable collection program tailored to your operation.

Your Partner in Food Scraps Management

We can help you achieve your sustainability goals for managing pre-consumer food scraps, post-consumer plate scrapings, or compostable service ware. Your materials are weighed upon pickup and composted locally at State registered facilities. The weight of your food scraps are reported back to you with your monthly invoice for internal tracking or to share with your customers.

When your business utilizes **Give A Scrap**, you're supporting healthy soils, a circular economy, and taking action to reverse climate change.

How Does It Work?

1. After signup, we'll discuss service and collection container options and a schedule to best meet the needs of your business.

2. We will deliver the containers along with program guidelines and training to you and your staff.

3. Post the program guidelines and begin collecting food scraps in the containers!

4. We'll pick up the containers on a regular schedule and replace them with empty, clean ones. We'll check in occasionally to make sure all is well, and email a monthly invoice with a report that includes the weight of the food scraps we've collected from your business. That's confirmation of the difference your business is making!

5. You can proudly let your customers know you are taking climate action by keeping your food scraps out of landfills, where they would otherwise create methane - a powerful greenhouse gas that contributes to climate change.

sarah@iriswds.com

We provide convenient collection containers that are suitably sized for your business.

Together with our customers, tons of food scraps are diverted from the landfill each year!
Thank you for Giving A Scrap!
